○

Masuk pada db.php, lalu login menggunakan username & password yang telah dibuat oleh anggota 2

○ Buka chrome lalu ketikkan <http://localhost:8080/index.php?r=gii> klik “Start” pada “Model Generator”

○

Tampilan setelah masuk pada “Model Generator”

The screenshot shows the 'Model Generator' interface of the Yii2 Code Generator. The browser address bar shows the URL: `localhost:8080/index.php?r=gii%2Fdefault%2Fview&id=model`. The page has a dark header with the 'yii code generator' logo and links for 'Home', 'Help', and 'Application'. On the left, a sidebar contains a list of generators: 'Model Generator' (selected), 'CRUD Generator', 'Controller Generator', 'Form Generator', 'Module Generator', and 'Extension Generator'. The main content area is titled 'Model Generator' and includes a description: 'This generator generates an ActiveRecord class for the specified database table.' Below this, the 'Database Connection ID' is set to 'db'. There are checkboxes for 'Use Table Prefix' (unchecked) and 'Use Schema Name' (checked). The 'Table Name' field is empty. There are also checkboxes for 'Standardize Capitals' and 'Singularize', both unchecked. The 'Model Class Name' and 'Namespace' fields are also empty. The Windows taskbar at the bottom shows various application icons and the system clock indicating 14:07 on 05/12/2024.

○ Pilih tabel pada database

This screenshot shows the same 'Model Generator' interface as the previous one, but with the 'Table Name' field populated with the text 'kategori'. The 'Database Connection ID' remains 'db', and the 'Use Schema Name' checkbox is still checked. The 'Model Class Name' and 'Namespace' fields remain empty. The browser address bar and the Windows taskbar (showing 15:35 on 05/12/2024) are also visible.

○

Klik “Generate”

Via Table

- ☒ Generate Relations from Current Schema
- ☒ Use `::class`
- ☐ Generate Labels from DB Comments
- ☐ Generate ActiveQuery
- ☐ Enable I18N

Code Template

default (C:\Users\User\basic\vendor\yiisoft\yii2-gii\src\generators\model\default)
